

School of Computer Science Engineering and Technology

Course- B. Tech
Course Code- CSET346

Year- 2022
Date: 04-10-2022

Type- Elective
Course Name: Natural language
processing
Semester- odd
Batch- ALL

Lab Assignment 08 – computing context text data

CO-Mapping

Exp. No.	Name	CO1	CO2	CO3
08	Computing context from text data	✓	✓	✓

Objective: The main motivation is to apply deep neural network for training data sequence wise.

1. Demonstrate Glove and wordnet to find the word similarity. Compare the functionality of both.
2. Train your data to find the context using GRU, RNN and LSTM
